

AI-Powered Medical Chatbot using IBM Bob for Intelligent Healthcare Assistance

Develop an Agentic AI Healthcare Assistant using IBM Bob that provides personalized, context-aware healthcare guidance, wellness recommendations, and general medical information through natural language conversations, improving access to reliable healthcare support while assisting users in making informed health decisions.

Objectives

Provide 24×7 AI-powered healthcare assistance.

Answer health-related queries using natural language.

Offer personalized wellness and nutrition recommendations.

Promote preventive healthcare and healthy lifestyle practices.

Encourage users to seek professional medical advice when required.

Enhance healthcare accessibility using IBM Bob, Generative AI, and Agentic AI.
